

The power of **natural** health

## HC8W Ashwagandha

**Hydrolysed - First in the industry**  
**5% Assay**

The HC8W Ashwagandha, with a composition of 1.5% Alkaloids, has strong stress relieving properties and acts as an effective antioxidant.

Ashwagandha is an adaptogen – a class of unique medicinal herbs which normalize physiological functions. With its powerful stress-relieving properties, Ashwagandha acts as a natural sedative. It improves your cognitive functions, eases all strains of fatigue and tension and acts as an effective antioxidant

HCW8 Ashwagandha Extract is developed using a proprietary extraction method. This extraction process ensures that all the active and essential constituents of the herb are extracted & retained. The HC8W Ashwagandha extract has a good aroma and a lesser bitter taste as compared to regular extracts.

### Extract Benefits:

- Anti depressant properties
