

The power of *natural* health

## HCWS Curcumin

Highest Assay  
Highest Bioavailability  
Residual Solvents as per  
ICH guidelines

The dynamic R&D department of Herbochem has developed water-soluble curcuminoids, with the highest assay and bioavailability in the industry.

Modern medical and technological research has found that curcumin induces cell death in tumorous cells, preventing multiple kinds of cancer and kills chronic inflammatory cells.

The research & development team at Herbochem have developed a water soluble and highly bioavailable and stable curcumin extract containing curcumin, Demethoxy curcumin & Bis-Demethoxy curcumin.

The HCWS curcumin is available at different grades of bioavailable curcumin. These are Curcuminoids at 10% & 15% (water solubility 250 mg in 100 ml) & Curcuminoids at 20% (Water solubility 150 mg in 100 ml).

### Extract Benefits:

- Has Antioxidant activity
- Helps improve Joint support
- Helps in Mood Control
- Promotes tissue soothing & healing
- Helps in controlling healthy cholesterol

### Specifications:

- HCWS Curcumin is available with curcuminoids at 10%, 15% & 20%
- HCWS Curcumin is soluble and dispersible in water
- Bulk density is at 0.40 mg
- Residual solvents are met as per ICH guidelines.
